Summary

A strong collaborator and creative problem solver who possess a demonstrated background in the implementation and maintenance of networks. I have hands on and detail-oriented approach to ensuring the smooth operation of communication networks. I am expert at anticipating and mitigating potential failures, and extensive experience of route analysis, fault isolation. Possessing excellent client facing skills and superb attention to details means that I can follow complex technical instructions to not only troubleshoot problems but also keep end users happy. I got training from someone who always has a professional and well-groomed appearance.

Skill Highlights

- Identifying, diagnosing, and resolving network problems.
- Monitoring network performance.
- Performing implementation and maintenance tasks on the LAN and WAN.
- Proactive in assessing and making recommendations for improvement.
- Willing to travel based on assigned project demands.
- Accurate documentation skills.
- Comprehensive knowledge of networking concepts.
- Coordinating upgrade schedules.
- Evaluating new software and hardware technologies.

◆ Personal:

- ❖ Listening actively and carefully to the opinions and ideas of others.
- ❖ Dealing effectively with highly stressful situations.
- ❖ Maintaining knowledge of emerging networking technologies.
- ❖ Able to drive results with a sense of urgency relative to the end user.
